

PROCESS MANAGEMENT

PROCESS MANAGEMENT

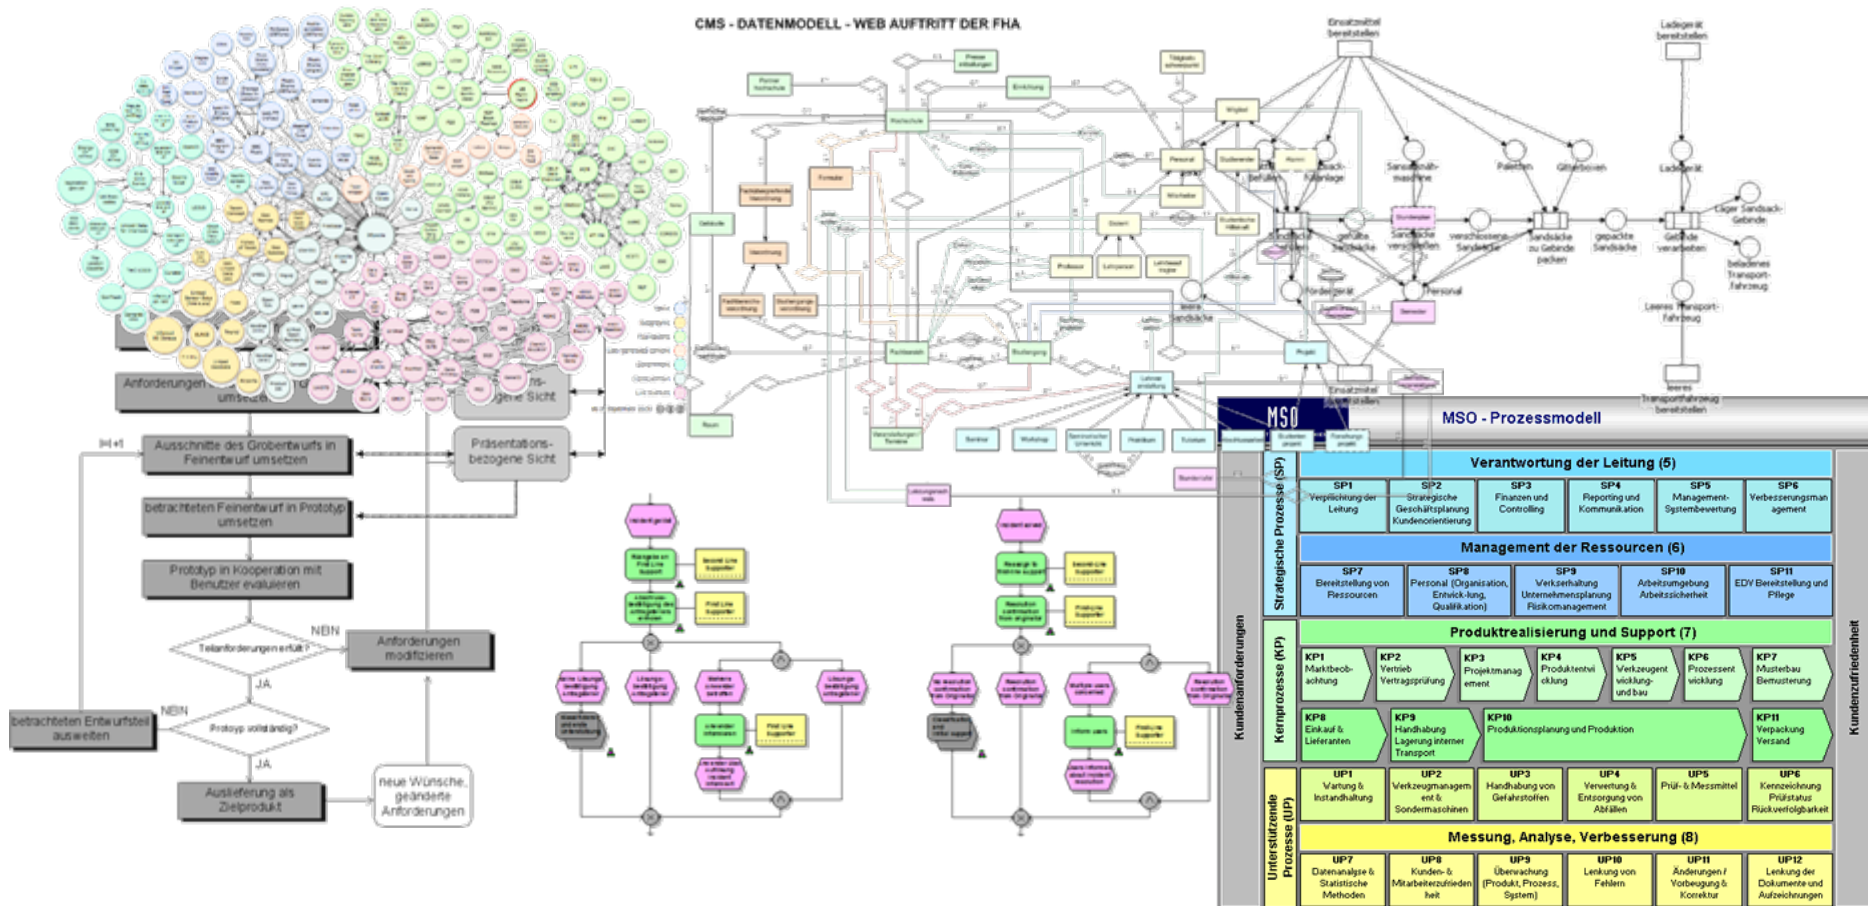

- Process managers are hired by companies that wish to design, maintain, change, and improve interdependent business processes
- Process Management tasks include
 - documenting business processes
 - formalising business processes
 - analysing business processes
 - improving business processes
 - implementing business processes
 - and: managing the former tasks!

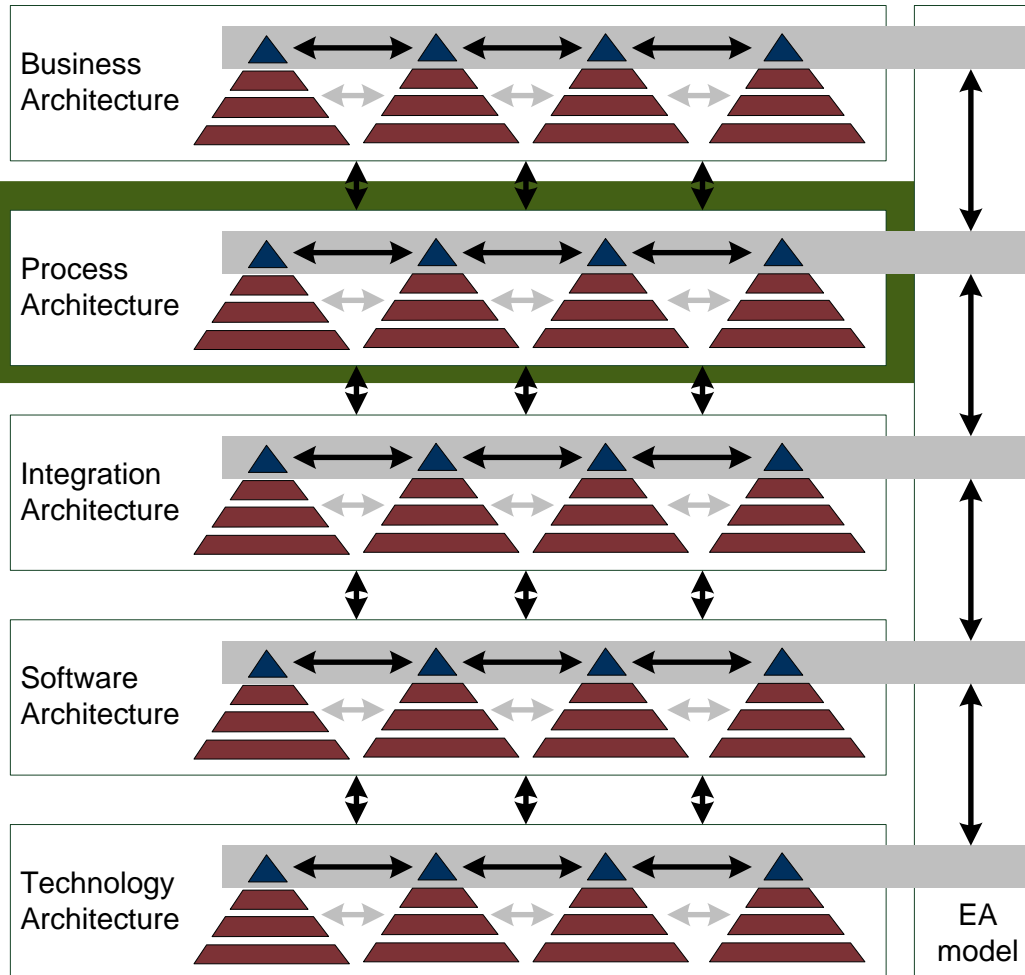

BASICS FOR THIS TRACK

CONCEPTUAL MODELS!

ASPECTS TO BE MANAGED

[Winter, Fischer 2006]

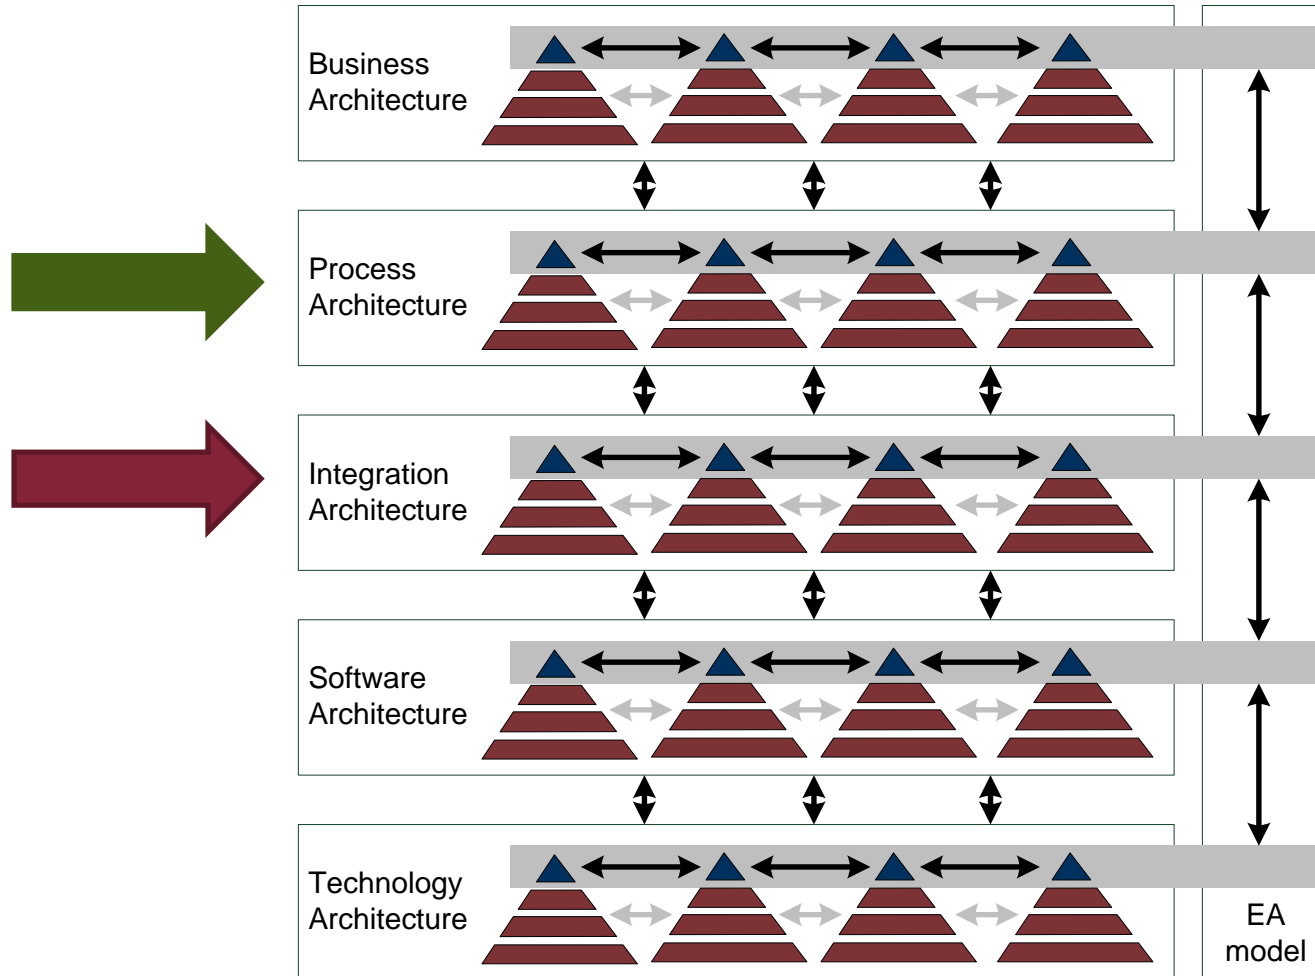

INFORMATION MODELLING

PD DR. DELFMANN (WINTER TERM)

- Advanced understanding of conceptual modeling, conceptual modeling languages and conceptual model analysis
- Learning goals:
 - Know how to design and apply modeling languages and tools of different kinds
 - Know how to really exploit the benefits of conceptual modeling through automation of model analysis
 - Know how to apply innovative techniques of conceptual modeling to different business domains

FOCUS OF INFORMATION MODELLING

[Winter, Fischer 2006]

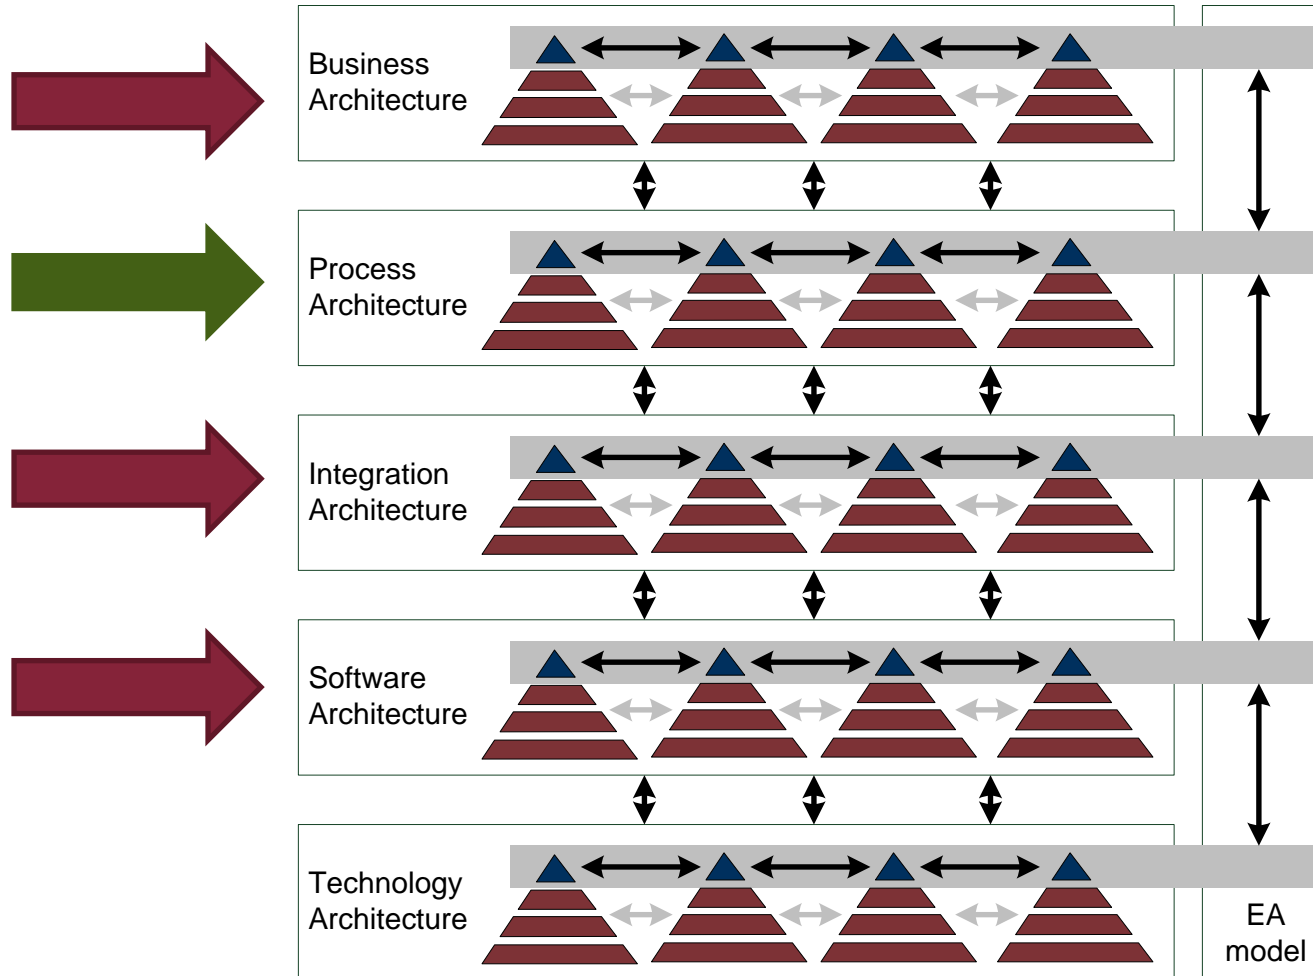

WORKFLOW MANAGEMENT

PD DR. DELFMANN, DR. FLEISCHER (SUMMER TERM)

- Topic: analyse, model, improve, and implement business processes
- Learning goals:
 - Understand the difference between business processes and workflows
 - Be able to model “real-world” business processes
 - Be able to transform business process models into workflow models
 - Be able to implement workflow management systems
 - Understand special aspects of workflow management and latest research results

FOCUS OF WORKFLOW MANAGEMENT

[Winter, Fischer 2006]

ENTERPRISE ARCHITECTURE MANAGEMENT

DR. BÖHLE (SUMMER TERM)

Present...

- Introduce the idea of EAM and basic concepts
- Present current developments, methods and frameworks in the domain of architecture development
- Introduce a concrete architecture realization process by
 - studying The Open Group Architecture Framework (TOGAF)
 - and its Architecture Development Method (ADM)

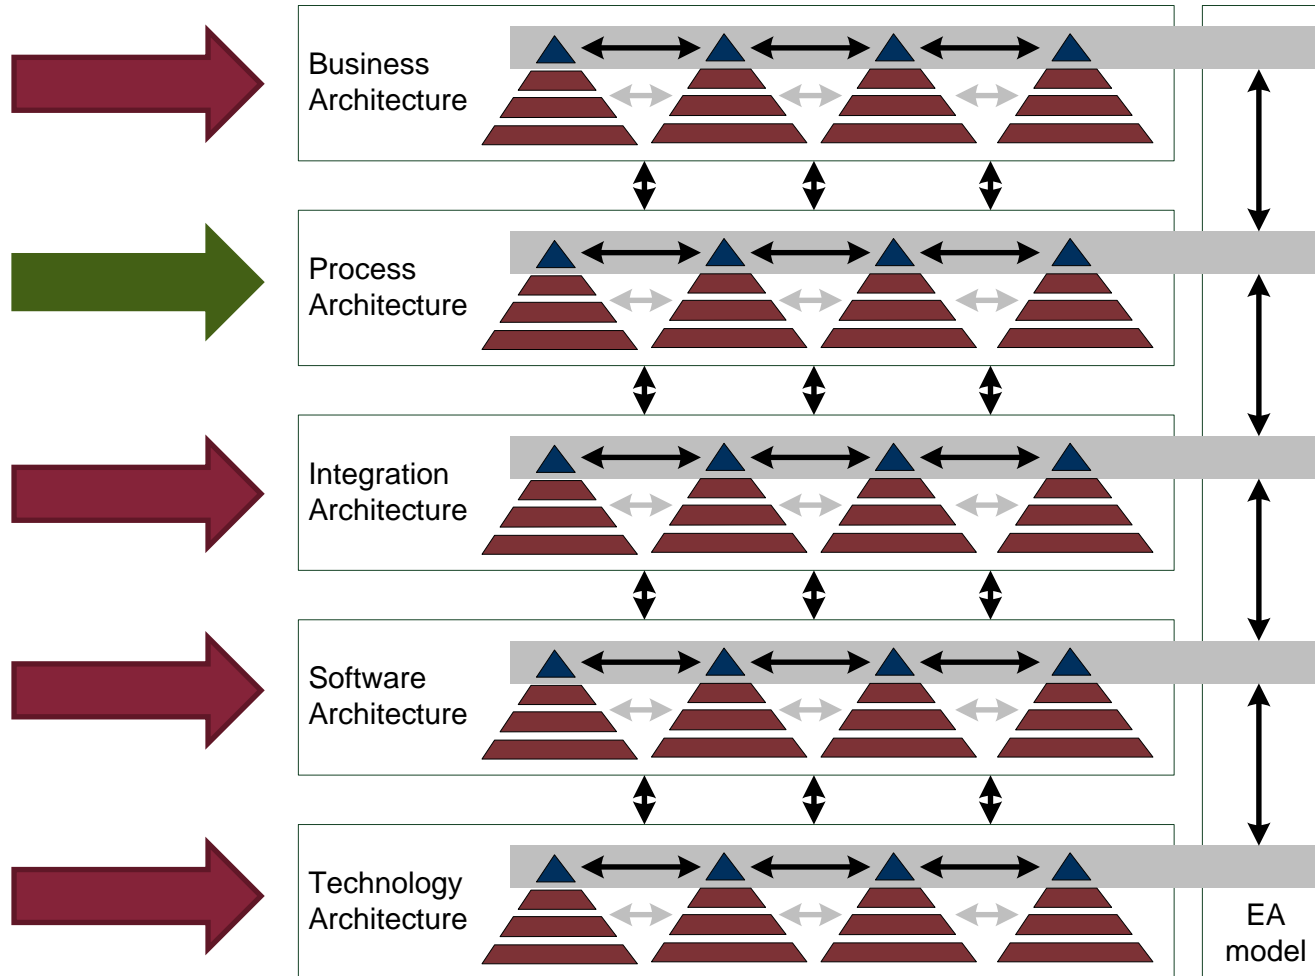

Convey...

- Practical skills in Enterprise Architecture modelling by introducing the modelling language "Archimate" in a tutorial.
- Practical experience in architecture development and presentation by work on an integrated realistic case study
- Real life insights by guest lectures from practitioners (industry, science & consulting), illustrating the reality of EA design and implementation in business

FOCUS OF ENTERPRISE ARCHITECTURE MANAGEMENT

[Winter, Fischer 2006]
